FOR THE LOVERS OF NATURE

ref : CA 2256

One needed a boat for the nature lovers. We have achieved this with the Trek Pro. Yours are the long journeys on river, lake and even the sea.

Its loading capacity enables you to take all you need for camping trips and its light weight makes portage a pleasurable moment. Quickly inflated and quickly folded, the Trek Pro is the ideal boat for the family excursions.

Very stable and extremely easy to manoeuvre in white water, its tubular structured inflatable floor also ensures smooth glides on calm water.

With its ingenious adaptable self bailing system that allows you to go down white water rivers or lakes by just adjusting the 'sock' in the needed position. It is in other words the ideal flexible canoe.

voyager

canoe

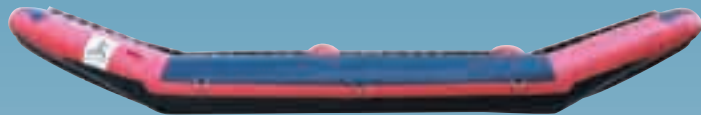

the CANOE who ASSURES - STABILITY, SECURITY

Within a few years, the Voyager became one of the best inflatable two to four persons canoe on the market. Its oversized tubes ensures an exceptional floatability, making it possible to load heavy equipment for expeditions (and from Nepal to the source of the Amazone river, one can say it has seen a lot). Its great stability allows rides on white water rivers up to class 5.

Built in Hypalon® neoprene its tubes are reinforced on the bottom with a special heavy duty fabric.

Four eyelet tapes allow for the fastening of the equipment, the inflatable or the wooden seats. All these qualities have made the Voyager the preferred boat for the most important leisure organisations.

ADVENTURE GARANTY

NEW

.....
Here is a light and compact boat. Ready to follow you everywhere on the river, lake even on the sea side. Easy to carry, manoeuver the SPRINT assures a god slide on calm water and lets you take advantage of the landscape without you getting tired. As for the bucket seats, they will garanty a good back position.

Built in Hypalon® fabric, much stronger than PVC, you will keep this boat all your life.
