

kayak k-air 240

LITTLE, LIGHT AND EASY

This inflatable kayak is the ideal model for children.

Light and easy to ride, it combines the paddle pleasure of the traditional rigid kayak with the security of an inflatable boat. Its sit-on-op shape permits to avoid the difficulties to escape from an enclosed kayak.

Light weight, only 12 kg (26lbs 8oz), allows an ease to carry or put it in the water.

Overall width	0,88 m (2'10,5")
Rooming width	0,38 m (1'3)

SURFING WAVES KAYAK

ref : KA 2275

The K-AIR 260 is light and compact at the same time. Its wider form at the back gives it a great stability on the water and the large air volume of the tubes insures a safe ride for all users.

Its small size once folded allows you to carry it in a backpack. You will then bring it with you in any far away place or other easy trip on lake or coastal sea rides.

Overall width	0,86 m (2'1")
Rooming width	0,38 m (1'3")

EASY RUNNING

ref : KA 2271

You have to see it to believe it, and especially try it. The K-AIR 300 is certainly the top of the sit-on-top kayaks. It combines the qualities of all inflatable boats (light weight, buoyancy, stability, comfort) with the ones of the best performing kayaks (quick response, rigidity,...).

With it, you will go everywhere. Thanks to its self bailing floor, it churns the most spectacular rapids with great precision, thanks to the lateral leg straps.

As for comfort, beside its inflatable floor, its adjustable back rest is also inflatable to avoid back injuries. Best of all, alone on the market, this K-Air, like the others is made of Hypalon®, which guarantees unequaled strength and durability.

GREAT FAMILY KAYAK

The two seater K-AIR 380 is light and easy to inflate and perfectly adapted to family use just by its size alone.

Rides on rivers or sea side trips, its inflatable and removable floor as well as the oversizing of the tubes ensures stability.

Equipped with leg straps to control its direction, the sit-on-top type K-AIR 380 guarantees safe rides for you and your children.

Well cared for and stored properly, the quality of the Hypalon® fabric, will permit you to keep this boat for many many years.

Capacity	2 persons
Tubes diameter	0,28 m (11")
