

# RAFT silver cloud

## FOR PROFESSIONALS ONLY

---

The pros are demanding, good, so are we.

The Aqua Design ACDraft

been designed especially for extrem or professional use. Constructed in Hypalon® neoprene fabric manufactured by Achilles, the tubes are made of 1100 Dtex weight and the floor of 1680 Dtex weight. This ensures a high resistance in extrem conditions and over time.

All the tubes are reinforced in rubber fabric on the bottom, this added benefit guarantees to all Silver Cloud rafts the best protection to abrasion of the tubes everywhere it is required.

All Silver Cloud rafts are equipped with self bailing floors.

# RAFT advantage

## HERE IS AN ADVANTAGE TYPE FOR ANY KIND OF RIVER

---

Present everywhere in Europe (and elsewhere), the Advantage are very fast thanks to the design of the rounded bow and self bailing floor.

Constructed in Hypalon® neoprene fabric, the tubes are made of 1100 Dtex weight and the floor of 1680 Dtex weight. The tubes are reinforced in rubber fabric on the bottom, up to the rub strake, the Advantage are made to meet any condition even the most extrem ones.

# RAFT challenge

## THE BEST AT THE BEST PRICE

---

Here is a raft that will please you.

Able to do it all, leisure activities as well as professional uses. Furthermore, it will attract you with its quality/price ratio: another AQUA DESIGN innovation, using a new Hypalon® fabric as solid as it is economical.
